SILENT AUCTION (RD 1)

Sealed bid, floor $26. A BID UNDER $26 IS DISCARDED AND YOU FORFEIT YOUR SILENT PICK. All 12 pay their own bid and pick in bid order, which also sets nomination control all draft.
PICK is an ILLUSTRATION, not a prediction: our own board read at each end of the rank span. The room will not draft in that order. RANK is stated as a fact and priced at nothing.

TIE1+ = share of the 5 years with a team ALREADY at this exact bid: join it and you are in a tie. TIE2+ = share with 2+ teams tied EACH OTHER there, so TIE1+ is never the smaller. "no data" in both = never bid, so nothing is known: NOT a measured 0%.
BUMP = bumps actually charged to win a tie. LIVE = a year the tie went to a live auction, where money was paid over the bid: an empty BUMP beside a LIVE year is not a free tie.
*LEFT and DISCR are PRE-BUMP: win a tie and the bump comes out of them too.

EST$ is what the room is likely to pay, fitted from real league prices; it compresses at the top, so treat it as a floor, not a point estimate, for your number-one target. MY$ is worth agair
